

unqork

The leading Codeless-as-a-Service platform
A completely visual way to develop complex, enterprise-grade software faster at a significantly lower cost.

A comprehensive solution for ESG data collection and validation.

Power ESG Initiatives across industries:

- + Asset Management
- + Banking
- + Capital Markets

Industry Challenge

Organizations are under increasing pressure to invest in—and demonstrate the effectiveness of ESG initiatives. Pre-built, one-size-fits-all solutions are not sustainable, because they:

- Vary widely across industries and from organization to organization
- Lack standardized reporting requirements
- Require gathering and integrating multiple, disconnected datasets
- Are subject to both changing regulations and evolving market forces.

Unqork Solution

With Unqork, you can quickly and easily meet all of these challenges. Rapidly deliver robust, easy-to-manage ESG applications and quickly adapt them as data collection and reporting requirements evolve:

- Flexibility in sources and methods of data collection
- Ability to expose built applications to external users (e.g., suppliers/vendors)
- Pixel-perfect branding
- Agility in changing rules and calculation
- Ease of integrations with reporting, calculation, and climate action services

CASE STUDY

Problem

A large global bank's private equity and credit fund targeting environmental sustainability startups needed a structured approach to collecting ESG data from its portfolio companies. The solution required a high degree of flexibility and customization of the UI/UX to meet the specific data collection needs of companies' portals as well as the bank's branding.

Solution

The bank used Unqork to digitize ESG data collection, using a combination of direct API connections. The application applied the bank's branding and created a custom experience per company based on the particular circumstances of the entity.

Impact

- **Delivered** Production ready solution in 16 weeks
- **Reduced** risk of reporting errors, shrunk time to report, and increased user satisfaction
- **Increased** visibility into WEF and Paris Agreement commitments using Unqork to track financed emissions.
